- vii. To prepare project proposals for organizations, companies and individuals
- viii. To provide financial management services
- ix. To conduct rapid need assessments in humanitarian situations and complex emergencies
- x. To organize events such as scientific and business conferences and training exercises

2. CORE BUSINESS AREAS

2.1. Research, Monitoring and evaluation

South Sudan has numerous humanitarian projects in addition to businesses and routine government services. These all need to be evaluated for efficiency, effectiveness and progress. ACL is a trusted partner to clients who require independent monitoring and evaluation of projects.

2.2. Business planning

Under this activity, ACL:

- Designs business plans for small and medium scale start-up businesses
- Formulates organizational policies and evaluate existing ones
- Supports organizations with project proposal writing
- Trains key technical persons on key organizational management aspects

2.3. Environmental impact assessment

ACL supports decision making in the oil sector by:

- Carrying out environmental impact assessment for new explorations
- Evaluating the impact of ongoing drilling activities

2.4. Capacity building

Our services target young professionals to acquire transferrable life skills and professional trainings such as:

- Monitoring and evaluation
- Research packages training
- Data collection techniques
- ICT skills and computer literacy
- Entrepreneurship skills
- Disaster management
- Nutrition

2.5. Research support and undertaking

Access Consulting Ltd:

- Writes and markets research undertakings on topical issues
- Supports research initiatives by other institutions
- Supports research analysis by individuals and organizations
- Conducts SMART surveys

2.6. Property management

Access Consultants engages in property brokerage services in addition to property management

2.7. Management services

This is currently done in partnership with HBQ Management Consultants, a management consultancy firm in Juba
